Bettie,

The current confirmation I have is for Lincoln only as I have yet to see any dates for Phoenix or Neptune. The Lincoln confirmation has the Day -15 primary data collection date scheduled for June 1, 2002.

Given the above dates for Lincoln, the study would have to go to the May 7, 2002 IRB at the latest. April 23, 2002 would also be a possibility if everything was ready to go but would probably be best to wait until the May 7, 2002 meeting.

Thanks,

Mike
